

Petition to clean up all processes associated with the approvals, licensing and regulation of the unconventional gas industry

To: The Honourable the Speaker and Members of the Legislative Assembly of New South Wales.

Given the substantial and growing body of scientific evidence of the risks posed by unconventional gas exploration and exploitation to water, human health and the environment, and the immense public opposition to the destructiveness of unconventional gas exploitation, the undersigned petitioners therefore ask the Legislative Assembly to

- (1) establish a Royal Commission into the granting of licences and the cumulative impacts of unconventional gas exploration and exploitation, including impacts on agricultural land;
- (2) suspend all unconventional gas industry licences until the results of a Royal Commission are known;
- (3) impose an immediate and permanent ban on all unconventional gas activity in all drinking water catchments in New South Wales; and
- (4) immediately cancel all licences that have breached licence conditions, including failure to drill within specified times and breaches of environmental management conditions.
